

POWER WHEN YOU NEED IT

Protecting People and Property for Nearly Half a Century

Clarke Power Generation, Inc. provides a complete line of quality stand-by and prime powered generator sets. Over the past 50 years, we have enhanced our knowledge of the emergency power industry through market leadership, hands-on experience, and design engineering.

By providing a full life-cycle for our products, from manufacturing through field service, we offer you the highest quality product at the lowest total cost.

Leadership, Innovation, Growth

Clarke Power Generation delivers every order with a quality built, fully engineered, competitive product that will provide reliable power when emergencies arise. And when an interruption in operation occurs, our existing service network is ready to serve your needs. We've lived by those standards since our first day in business. Clarke sold our first diesel generator set in 1964 as a GM Diesel distributor. From that humble beginning, we have grown substantially and now produce and distribute a full line of power generation products from basic open generator sets to fully enclosed, walk around, sound attenuated units, and UL 2200 Listed products. Our open generator sets, ranging from 30kw to 2000kw, are UL 2200 Listed.

CLARKE™ Through our relationship with Clarke Fire Protection Products, we have evolved into a full line generator set manufacturer. Over 30 years ago, Clarke began manufacturing UL Listed, FM Approved fire pump drivers for the U.S. market and now is the worldwide leader in fire pump driver sales. We now bring this same engineering, design, global marketing team and manufacturing knowledge to our generator set customers.

Clarke Power Generation has strategically located service facilities that provide emergency repair work 24 hours a day, 7 days a week. The mobile fleet of service technicians is trained and certified to perform the preventive maintenance or the emergency repair that is required. This comprehensive coverage will keep your unit running efficiently and ensure a long "in service" life.

45+ years of milestones & success

1964:

Clarke begins building and selling diesel engine generator sets as a regional distributor for General Motors (GM).

1980:

Clarke begins manufacturing UL-FM engines utilizing naturally aspirated and turbocharged engines from DDC.

1981:

Clarke introduces UL-FM MD series of low horsepower engines.

1994:

Clarke acquires Mid South Detroit Diesel Allison

1979:

Clarke first develops its own UL-FM Certified engines and structures a multi-member DDC (Detroit Diesel Corp.) distributor sales consortium; DDC transfers certification and fire pump global marketing activities to Clarke and discontinues production of its own certified engines.

1992:

Clarke acquires Western Diesel Services

1992:

Clarke begins distributing Detroit Diesel Power Generation Systems.

1998:

Clarke begins manufacturing mounting bases for the pump and engine assembly.

Power When You Need It

Clarke Power Generation offers a complete line of diesel and natural gas generator sets. We offer power packages from 30kw up to 2000kw

for Stationary Stand By, Stationary Prime, Mobile Stand By and Mobile Prime applications.

Superior Engineering, Quality Manufacturing, Proven Performance

Throughout Clarke's history, we have stayed true to proven engineering principles, best in class manufacturing practices and comprehensive testing procedures. Every generator set that leaves our plant is built to the highest standards and rigorously tested for reliable performance. Nothing is left to chance. Every generator set must perform on demand and without fail.

Clarke Power Generation maintains a close working relationship with world class suppliers to assure consistent product availability. We have more than 50 generator set models available in both diesel and natural gas engines.

State of the art technology and engineering, 24/7 service support, and global marketing... **Clarke Power Generation provides Power When You Need It.**

Low Cost of Ownership

Clarke Power Generation offers a unique value proposition for our customers. By designing, manufacturing, selling and servicing our products, we eliminate unnecessary distribution and marketing channels. As a result, we bring you the highest absolute value at the most competitive cost.
